**AMIC Workshop on Management of Environmental Information
Resources for Journalists, Singapore, Nov 9-14, 1998. - Singapore : Asian
Media Information and Communication Centre, 1998.**

lv (Various pagings)

The workshop programme encompassed three modules. A concept module covered the background of environment problems in the region and the participants' responsibilities as journalists. A skills development module allowed participants to discuss problems in reporting about environmental issues in the region and possible solutions and to acquire advance writing and editing skills. A management module exposed participants to new technologies and to work together to create and set up an environmental information Website called ECANET.
