AMIC OANA Workshop on Economic Perspectives of Asean, Singapore, Nov 30-Dec 2, 1983 . - Singapore : Asian Mass Communication Research & Information Centre, 1983.

lv (various pagings)

The aims of the seminar was first to focus attention on adjustments that Asean countries will have to make to the structure of their economies to cope with adverse changes in the international environment. The second purpose is to remind journalists that many of the problems facing their countries are the same. A detached view of the difficulties being faced elsewhere should help participants gain a better insight into those at home.
