As schools and universities in the Asia-Pacific region expand their educational programmes, several innovative projects have been developed using information and communication technologies to enhance the learning environment for both students and teachers. Academic institutions are facing increasing demands to use these technologies as tools for more effective learning, as means to become part of an increasingly connected community of resources and as platforms for supporting teachers. This symposium explores these demands and provides participants with ideas and practical suggestions about how to employ and integrate new learning technologies into their classroom environment.

CONTENTS

1. Programme. 4p.

2. List of Speakers. 4p.

9. PC Trends and Audio-Video Conferencing. By Audrey Ng. 6p.

15. The Library and Online Learning Via GEMS. By Hazel Loh. 6p.
