AMIC-CWDS-UNESCO CONSULTATION
ON WOMEN, MEDIA AND
PROSTITUTION,
NEW DELHI,
FEB 24-26, 1986
The study on women, media and prostitution was carried out in Malaysia, Philippines and India. It focused on aspects which run counter to human rights and dignity of women, ie forced prostitution, sex-tourism, sexual violence, the channels and methods used for sex-tourism, and prostitution and for perpetuating the exploitation of women. Each study looked at how the existing communication media had responded to these issues. The first set of questions was addressed to the reasons why the media in most countries previously tended to be silent on this issue.
